# John Juneau

APPLIED ECONOMIST • QUANTITATIVE RESEARCHER

San Diego, CA • 224-330-7443 • jjuneau@ucsd.edu • LinkedIn • johnjuneau.github.io

## PROFILE

Applied economist and Ph.D. candidate with 7+ years of experience turning complex data into decision-relevant evidence. Expertise in causal inference, quantitative modeling, and large-scale microdata, with experience spanning the Federal Reserve, Brookings Institution, and academic research.

## EXPERIENCE

Washington, DC

**Federal Reserve Board of Governors**

*Summer Dissertation Fellow; Senior Research Assistant, Fiscal Analysis* 2025; 2018--2021

- Returned as a dissertation fellow to advance policy-relevant research on labor reallocation and long-run economic change.
- Conducted empirical research in the Division of Research and Statistics and received a Special Achievement Award in 2020.
- Coordinated and taught in a data-analysis course for Howard University undergraduate and graduate economics students.

San Diego, CA

**University of California, San Diego**

*Doctoral Researcher, Department of Economics* 2021--Present

- Built reproducible workflows in Stata, R, and MATLAB to analyze labor, spatial, and public-policy questions.
- Combined linked, full-count U.S. Census records with a quantitative model to measure how family background affects worker mobility and structural change.
- Co-developed a causal analysis of 30 years of income-tax microdata using panel methods, event studies, and local projections to estimate employment responses to state tax changes.

Washington, DC

**Brookings Institution**

*Research Assistant to Carol Graham* 2017

- Supported research on the geography of economic opportunity and well-being in the United States.

## SELECTED IMPACT

Independent doctoral research

**Labor mobility and U.S. industrialization**

- Linked historical father–son Census records and estimated a structural model; found that intergenerational persistence slowed U.S. industrialization by **23.2%**.

With Byron Lutz

**State tax policy and employment**

- Found positive employment responses to tax cuts broadly targeted toward lower-income households, with no corresponding evidence for cuts targeted at the highest-income households.

AEA Papers and Proceedings, 2023

**Sprouting Cities: How Rural America Industrialized**

- Coauthored peer-reviewed research on the role of emerging rural cities in the U.S. transition from agriculture to industry.

## EDUCATION

**University of California, San Diego**

*Ph.D. Candidate in Economics* 2021--Present

**Washington and Lee University**

*B.A. in Economics with honors* 2018

Minors in Mathematics and Poverty Studies

## TOOLKIT

ADVANCED Stata, R, MATLAB, Excel, LaTeX

WORKING KNOWLEDGE Python, FAME

METHODS Causal inference, panel data, event studies, local projections, quantitative modeling

RECOGNITION National Science Foundation Graduate Research Fellowship (2021) • Federal Reserve Board Special Achievement Award (2020)
