JOB MARKET PAPER **Of Fathers and Farms: How Intergenerational Persistence Shapes Structural Transformation**

Abstract. How much faster could the United States have industrialized if new workers were not more likely to work in their parents' sectors? To study this question, I develop a two-sector general equilibrium Roy model where workers are either more productive or otherwise more attached to their parents' sectors. I show that both mechanisms meaningfully affect the static and dynamic sectoral reallocation of workers in response to labor demand shocks. Taking the model to linked father-son records in census microdata, I find that both mechanisms are quantitatively important sources of intergenerational persistence in sector choice. Counterfactual simulations reveal that eliminating intergenerational persistence altogether increases U.S. industrialization between 1880 and 1940 by 13.3 percent, but this is almost entirely explained by the inherited productivity mechanism.

RESEARCH EXPERIENCE	Federal Reserve Board of Governors Washington, DC	2025
	Summer Dissertation Fellowship	
	University of California, San Diego San Diego, CA	2022
	Research Assistant for Fabian Eckert	
	Federal Reserve Board of Governors Washington, DC	2018–2021
	Senior Research Assistant, Fiscal Analysis (Division of Research and Statistics)	
	Brookings Institution Washington, DC	2017
	Research Assistant for Carol Graham	
	Washington and Lee University Lexington, VA	2016–2018
	Research Assistant for Katie Shester and Chris Handy	
AWARDS AND HONORS	TA Excellence Award , University of California, San Diego	2024
	Graduate Research Fellowship , National Science Foundation	2021
	Special Achievement Award , Federal Reserve Board of Governors	2020
	Kim Family Prize , Washington and Lee University	2018
	QuestBridge National College Match , Washington and Lee University	2014
TEACHING EXPERIENCE	University of California, San Diego San Diego, CA	2021–Present
	ECON 210C: Macroeconomics C (Graduate Core)	
	ECON 110A: Long Run Macroeconomics	
	ECON 2: Market Imperfections and Policy	
	Federal Reserve Board of Governors Washington, DC	2018–2020
	Project Coordinator and Teaching Assistant for Data Analysis course taught to Howard University Undergraduate and Graduate students in Economics	
	Washington and Lee University Lexington, VA	2016–2018
	ECON 203: Econometrics	
	MATH 118: Introduction to Statistics	
SKILLS	Languages: English (native), Spanish (basic).	
	Programming (Advanced): Stata, R, MATLAB, Excel, $\LaTeX$	
	Programming (Basic): FAME, Python.
